Church Development Project Prayer Update

Give thanks for

- continued support for the project, particularly ideas for activities and events which are still coming In
- For the wonderful response to our gift day
- That local residents have not raised objections to the project following notification from the Council

Please pray earnestly for Colchester Borough Council as the planning authority, that they would approve the project. Although there have been no objections from local residents, the Highway Authority of the council have raised concerns regarding the access from Ipswich Road. We need to respond to this and require the services of a traffic management specialist to provide advice and information. Pray for clear, concise and effective communication to resolve this issue before the planning decision is made.

Please also pray for

- The planning of proposed events, especially a Community Day on the May Bank Holiday
- Preparation of literature to share with the community and charitable trusts etc
